TUALATIN VALLEY
WATER DISTRICT

Westlawn Terrace Water Main Replacement Project: Project Update

Dear Valued Customer,

Following is an update about an upcoming water main replacement project in your neighborhood.

In late September/early October 2024, Tualatin Valley Water District (TVWD) is scheduled to begin the Westlawn Terrace Water Main Replacement Project. The project will include replacing about 800 feet of the current 2-, 6-, and 8-inch water main serving customers on NW Westlawn Terrace, from NW 128th Avenue to NW 130th Avenue, with a new 8-inch ductile iron water main and installing a new pressure regulator and access vault.

The project is expected to be complete in about six weeks.

Water mains are underground pipes that carry treated drinking water from a water treatment plant to a customer's home or business. A water pressure regulator controls and reduces the pressure of incoming water from the water main into a neighborhood distribution network, and an access vault protects this infrastructure.

The project will improve the water system in this area by:

- Addressing aging infrastructure.
- Upgrading infrastructure with a history of leaks.
- Increasing water capacity and pressure to the area.
- Providing a larger immediate water supply to support firefighting response.

This project is a \$475,000 investment supported by water rates.

Project Updates

TVWD will provide detailed information about the upcoming project to customers in the neighborhood closer to when it begins. Information will include the construction schedule,

impacts to customers and the neighborhood, and what customers can expect during the process.

Learn more about the project and sign up for regular project updates – including changing road impacts and planned water service interruptions – at [TVWD.org/Westlawn](https://www.tvwd.org/Westlawn).

Questions?

- Call: (503) 848-3000

- Website: [TVWD.org/Westlawn](https://www.tvwd.org/Westlawn)
- Visit: TVWD Office – 1850 SW 170th Avenue, Beaverton, Oregon 97003

Thank you for your understanding and cooperation as TVWD works to strengthen the water infrastructure in your neighborhood.

More about TVWD's Water Main Replacement Program

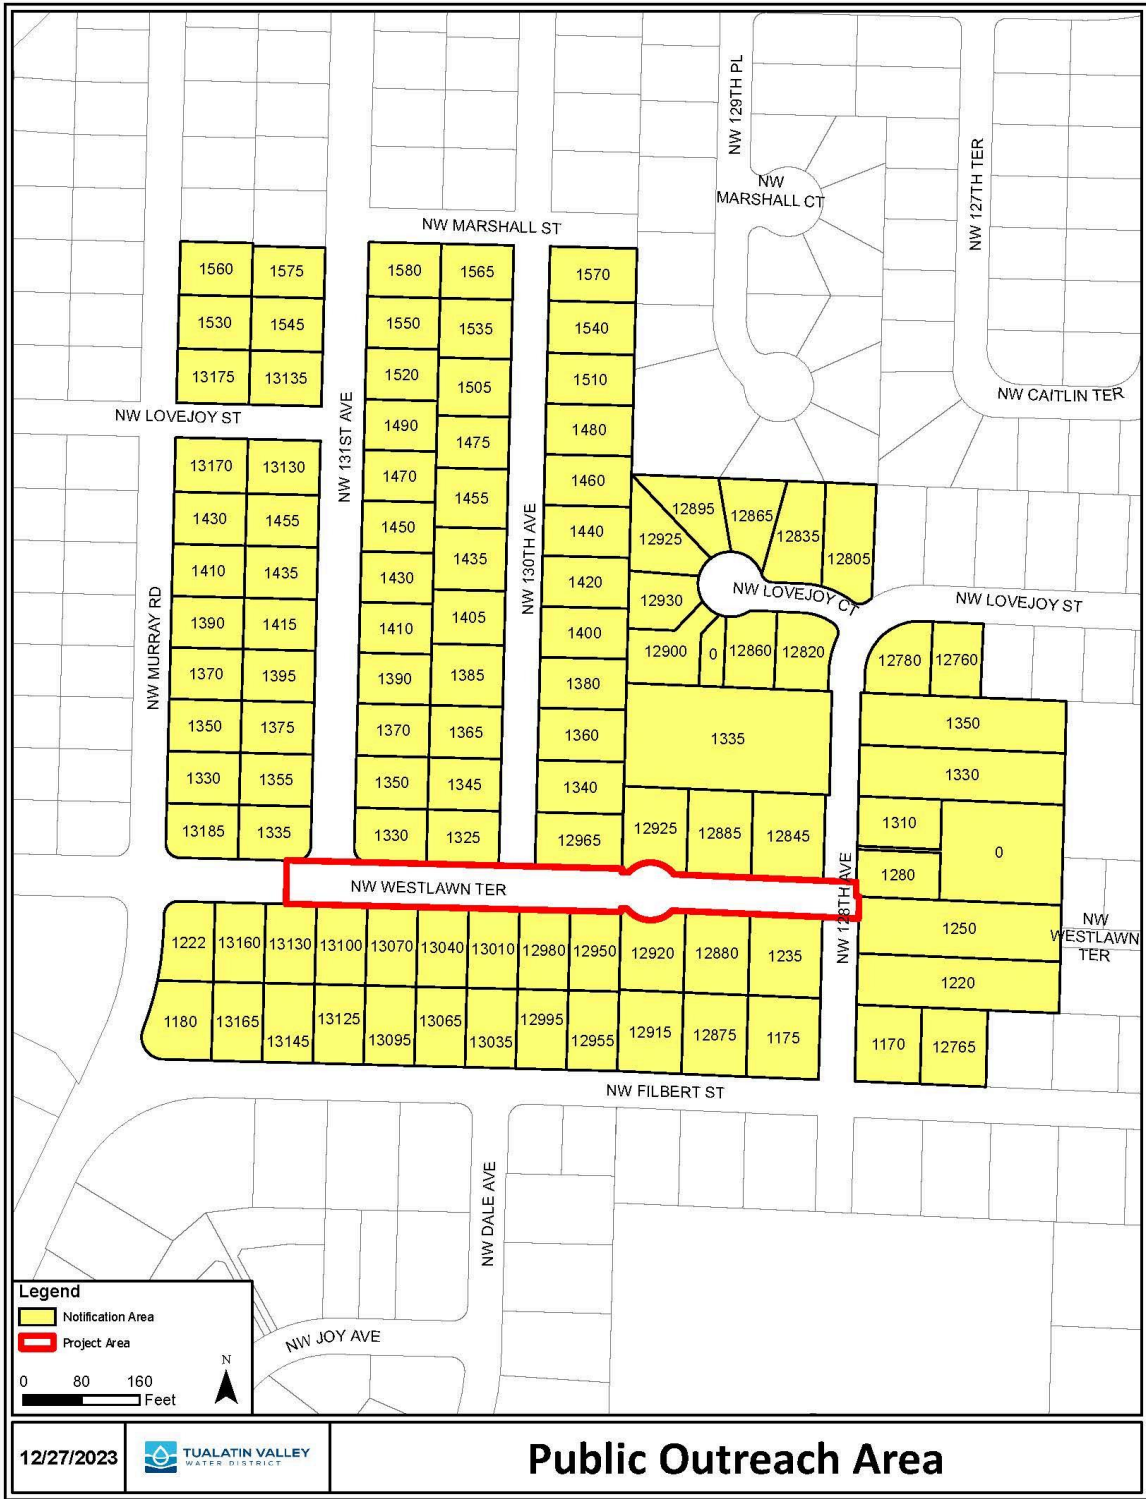

TVWD maintains over 760 miles of underground water mains.

Aging water mains can be prone to leaks and breaks. TVWD's Water Main Replacement Program systematically identifies the most susceptible water mains in the water distribution system. They are then replaced with newer, more durable pipes to enhance their reliability and reduce the frequency of water service interruptions to customers.

On average, TVWD replaces thousands of feet of water main each year in neighborhoods across TVWD's service area. Main replacement projects are funded by water rates.
